

Director of Intellectual Property

- Patents and Licensing
- Full-time Executive role

A proudly Australian company, CSL is today a global biopharmaceutical leader, responsible for developing products that treat and prevent serious human conditions. Through our work, we touch millions of lives every day and have established a reputation for outstanding performance, innovation and integrity.

This executive role offers you the perfect chance to utilise your extensive skills and experience in a close-knit team environment. As a Director of Intellectual Property, you, along with others in the team, will take responsibility for the preparation, filing, prosecution, maintenance and protection of patents generated by CSL or licensed in from third parties. You will act as a source of expertise for the organisation, instructing patent attorneys and offering advice on licensing and intellectual property matters. You will assist R&D to ensure protectable intellectual property is generated and that there is no infringement on the intellectual property of others.

Supporting the Business Development Department, you will contribute to discussions on and participate in licensing negotiations, due diligence activities, intellectual property issues, deal strategy and structure. Reporting to the Executive Vice President – Licensing, you will analyse third party patents for freedom to operate issues and review proposed publications to ensure the protection of intellectual property. Additionally, you will maintain an awareness of industry standards and conduct all activities in compliance with CSL policy and SOPs.

You have tertiary qualifications in a relevant scientific field, preferably immunology, and you are a qualified Patent Attorney. Your extensive professional experience includes Patent management in an R&D drug development environment. As a genuine people person, you possess strong communication and negotiation skills and enjoy developing close working relationships. Naturally, you are highly organised, scientifically capable and have excellent analytical skills.
